## ABOUT ME

After completing my degree in Game Design, I have been obsessed with the concept of working within the games industry. After graduating in the Autumn of 2019 I have been actively working and improving my skills and understanding of not only the game industry but the software involved.

Being an avid gamer myself I love the concept of getting to work within an industry that not only gets to design and create concepts but what allows you to feel and play your work after. I look forward to being offered the opportunity to work with a team of designers and evolving myself into a role within that team.

## EDUCATION
